**NEW! ToolScoot & ToolTower Accessories** See Next Page
This great new Toolbox is designed to mount securely in the space already available at the bottom of your Huot ToolScoot. With inside dimensions of 23-5/8” x 17” x 4” the lockable drawer provides ample space for most any tool, manual, CD’s, lunchbox, billfold or whatever you want to keep handy within your work space. The drawer glides easily on full extension HD ball bearing slides and the full sized lid with built in cam-lock keeps everything clean and secure. Huot Toolbox Drawer easily mounts in your ToolScoot in just minutes with holes already existing on your cart. It can also be mounted on a Huot ToolTower by simply drilling a few ¼” holes.

EDP #14900

Our doors are built from heavy 16 gauge steel for strength with a durable polycarbonate window for visibility. A large barrel piano style hinge makes installation a snap. They provide security as well as protect your valuable toolholders from flying chips and other airborne contaminants. Each door has a built in cam-style lock that mates with the other door providing a positive connection at both the top and bottom. The polycarbonate window offers protection yet allows the user to locate the proper tool at a glance. Order one set of doors per side.

**Custom Scoot**

Although we can build carts for almost twenty different toolholder sizes ranging from the common BT, CAT and HSK sizes to the most obscure, we don’t cover them all. With that in mind and knowing someone out there still needs our help, we’ve devised a cart just for them. This customizable product consists of a 3 shelf TriScoot with a 3/8” thick polycarbonate sheet secured to each metal shelf. All you need to do is provide us with the dimension at the top of the longest plane (shown as D1 on the diagram shown here) on your toolholder and we’ll mill the holes in the polycarbonate to fit your need.
The world famous Huot ToolScoot is now available with 3 shelves for even more storage space in the same footprint. This cart is ruggedly built just like the original but with a third more capacity and standing almost 7" taller.

**Protective Cover**

Cover provides protection for your valuable CNC tooling. The see-through front and back panels provide “at-a-glance” locating of the right toolholders needed for your job while protecting them from chips, dirt, dust, and other airborne contaminants. Multiple H.D.#5 nylon zippers allow easy access from either side and from top to bottom. Cover is for the original ToolScoot only. Will not work on Super or Speedy versions.  
Cover comes with rigid metal support frames that bolt onto your Huot ToolScoot providing 18” of space between the top shelf and the top of the cover. Cover is commercially sewn from rugged 19 mil, double polished clear vinyl and black 18 oz. vinyl-coated nylon.

Molded Inserts for V-Flange and HSK Toolholders

JIS B 6339 (BT-Flange Style)

JIS B 6399 (BT-Flange Style)

Part #9601  30 Taper  Part #9603  35 Taper
Part #9606  45 Taper  Part #9615  HSK 63A  Part #9616  HSK 100A
Part #9617  40 Taper  Part #9618  50 Taper

Toolholder inserts are molded using high impact plastic. The special plastic provides a highly durable material that is resistant to breakage and can withstand the weight of tooling over time without becoming brittle. With toolholder inserts 9615, 9616, 9617 and 9618, tapered tooling easily slips in to the form fitting holder, keeping the tooling safe from marring, nicks or chipping.
